

The Park Board was given a presentation from a company called Unlimited Play. They are the company behind building Zachary's Playground in Lake St. Louis and Brendan's Playground in Westhoff Memorial Park in O'Fallon as well as several others. These parks are universally accessible playgrounds that provide freedom of play for all children and families. The Park Board was very impressed with the presentation and forwarded on the information to the Board of Alderman.

I would like to see the City obtain land for a playground like this and then raise the funding necessary to build the facility. In addition to local residents, families would come from all over to utilize the playground. We are currently looking for some land to be donated and I would like to see this project moved significantly forward during this coming year.

For your benefit I have attached some additional information about the company and the playgrounds. If you have a questions please let me know and feel free to edit my comments to fit your needs.
